

Why change something that is not broken. For 30 years we lived with our present time. Now it has been decided that the state of Indiana needs to be all on one time. Now with all the counties wanting to go their own way the whole state will be a complete mess with different time zones.

Please leave the time as it is or change the whole state to one time zone. It is very nice not to have to change our clocks every six months. Yes, we do know how to change our clocks.

Ruth Thompson
